

Пакетная обработка изображений в Word

Макрос на VBA, который изменяет размер выбранных изображений до 65% и увеличивает яркость на 10%:

```
Sub Dannoff()  
Dim pic As InlineShape, w!, h!, i&, n$, b As Boolean  
With Application  
    b = .DisplayStatusBar  
    .DisplayStatusBar = True  
    .ScreenUpdating = False  
End With  
n = "из" & Selection.InlineShapes.Count  
For Each pic In Selection.InlineShapes  
    i = i + 1  
    Application.StatusBar = "Работаем с картинкой" & i & n  
    If pic.Type = wdInlineShapeHorizontalLine Then  
        pic.Delete  
    Else  
        pic.PictureFormat.Brightness = 0.6  
        If pic.Height > 30 Then  
            With pic  
                w = .Width  
                h = .Height  
                .Width = w * 0.65  
                .Height = h * 0.65  
            End With  
        End If  
    End If  
Next  
With Application  
    .DisplayStatusBar = b  
    .ScreenUpdating = True  
End With  
End Sub
```

Макрос на VBA, который увеличивает яркость до +20%:

```
Sub brightness()  
Dim pic As InlineShape, w!, h!, i&, n$, b As Boolean  
With Application  
    b = .DisplayStatusBar  
    .DisplayStatusBar = True  
    .ScreenUpdating = False  
End With  
n = "из" & Selection.InlineShapes.Count  
For Each pic In Selection.InlineShapes
```

```
        i = i + 1
        Application.StatusBar = "Работаем с картинкой " & i & n
        pic.PictureFormat.brightness = 0.6
    Next
    With Application
        .DisplayStatusBar = b
        .ScreenUpdating = True
    End With
End Sub
```
